

Simaab, Nimra and Areeza are busy in making their clients project which is to be submitted at 4PM. These 3 are the web-designers of dimly-lit office.

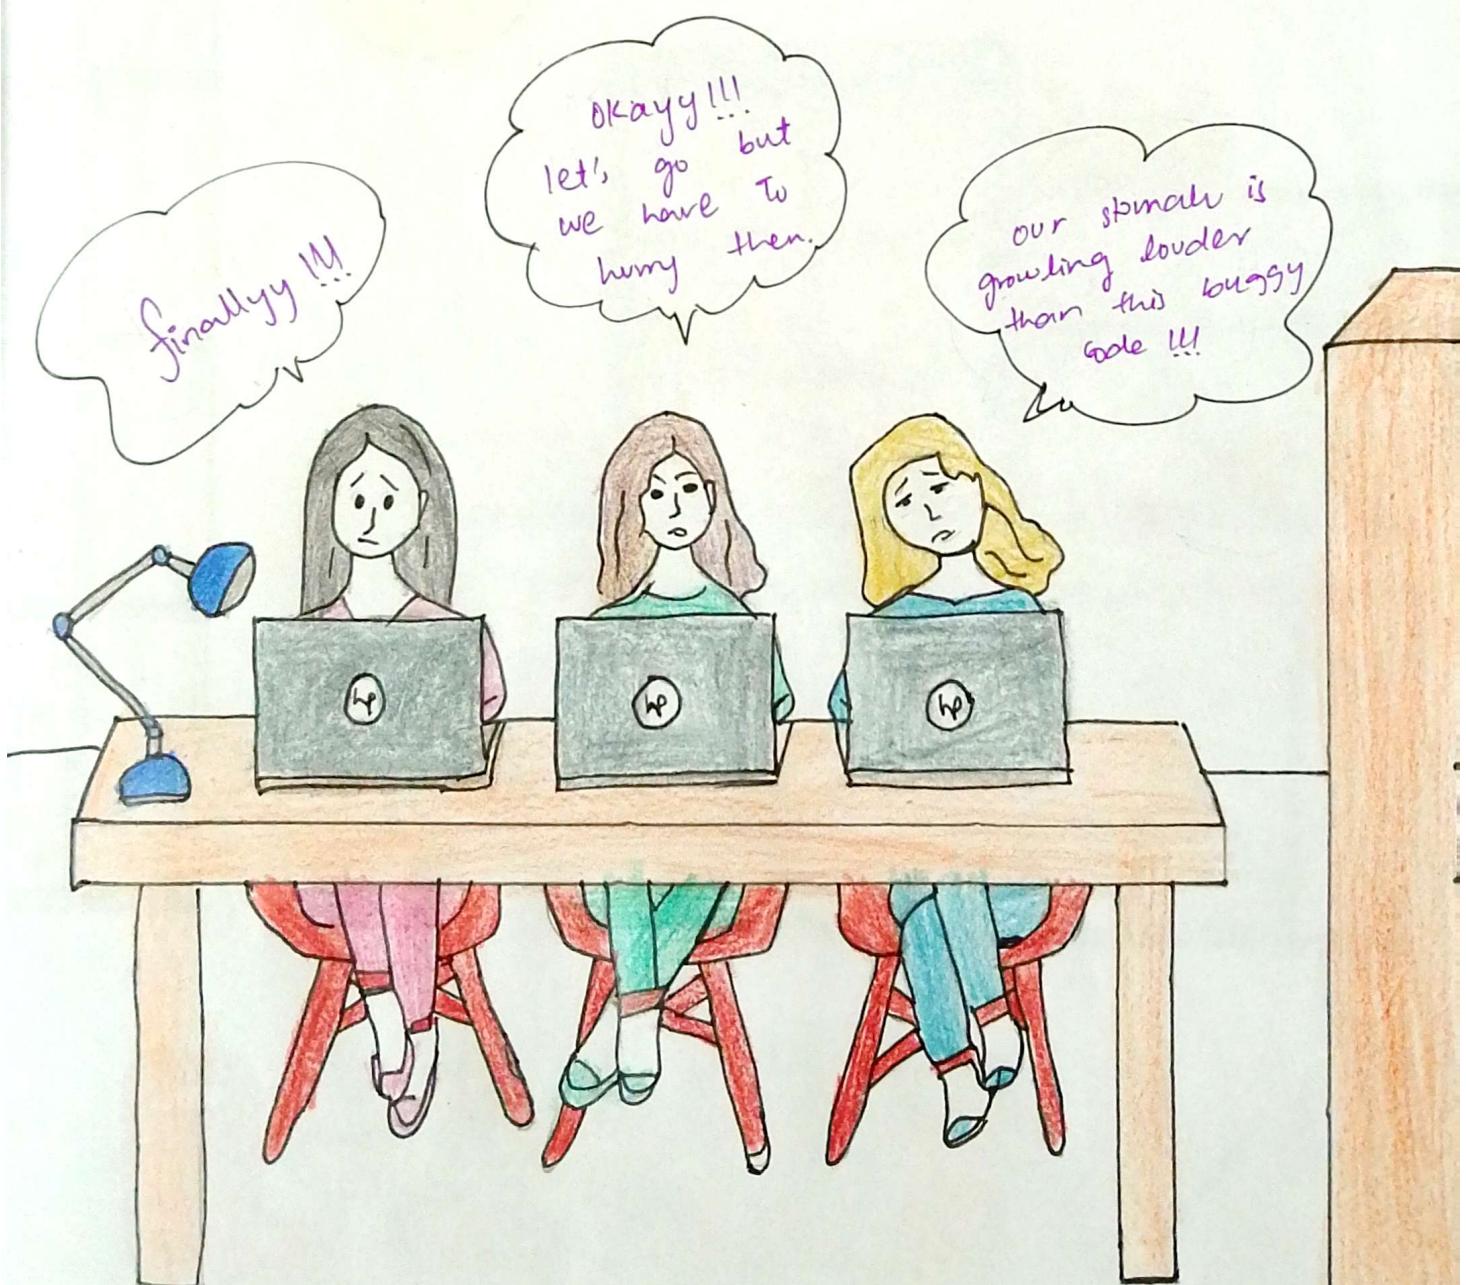

They have been working since morning, without having their breakfast. Nimra and Areeza are starving so much so that want to have lunch.

③ Here Areeza & nimra are convincing simaab to have lunch but simaab wan't To continue project as they are running out of time but at the same time , she also want to have lunch.

And atleast, all agreed to have lunch to fresh up their minds & they went to the cafeteria.

⑤ Areeza, nimra & simaals came to cafeteria only to found out that all the food & drinks has been finished.

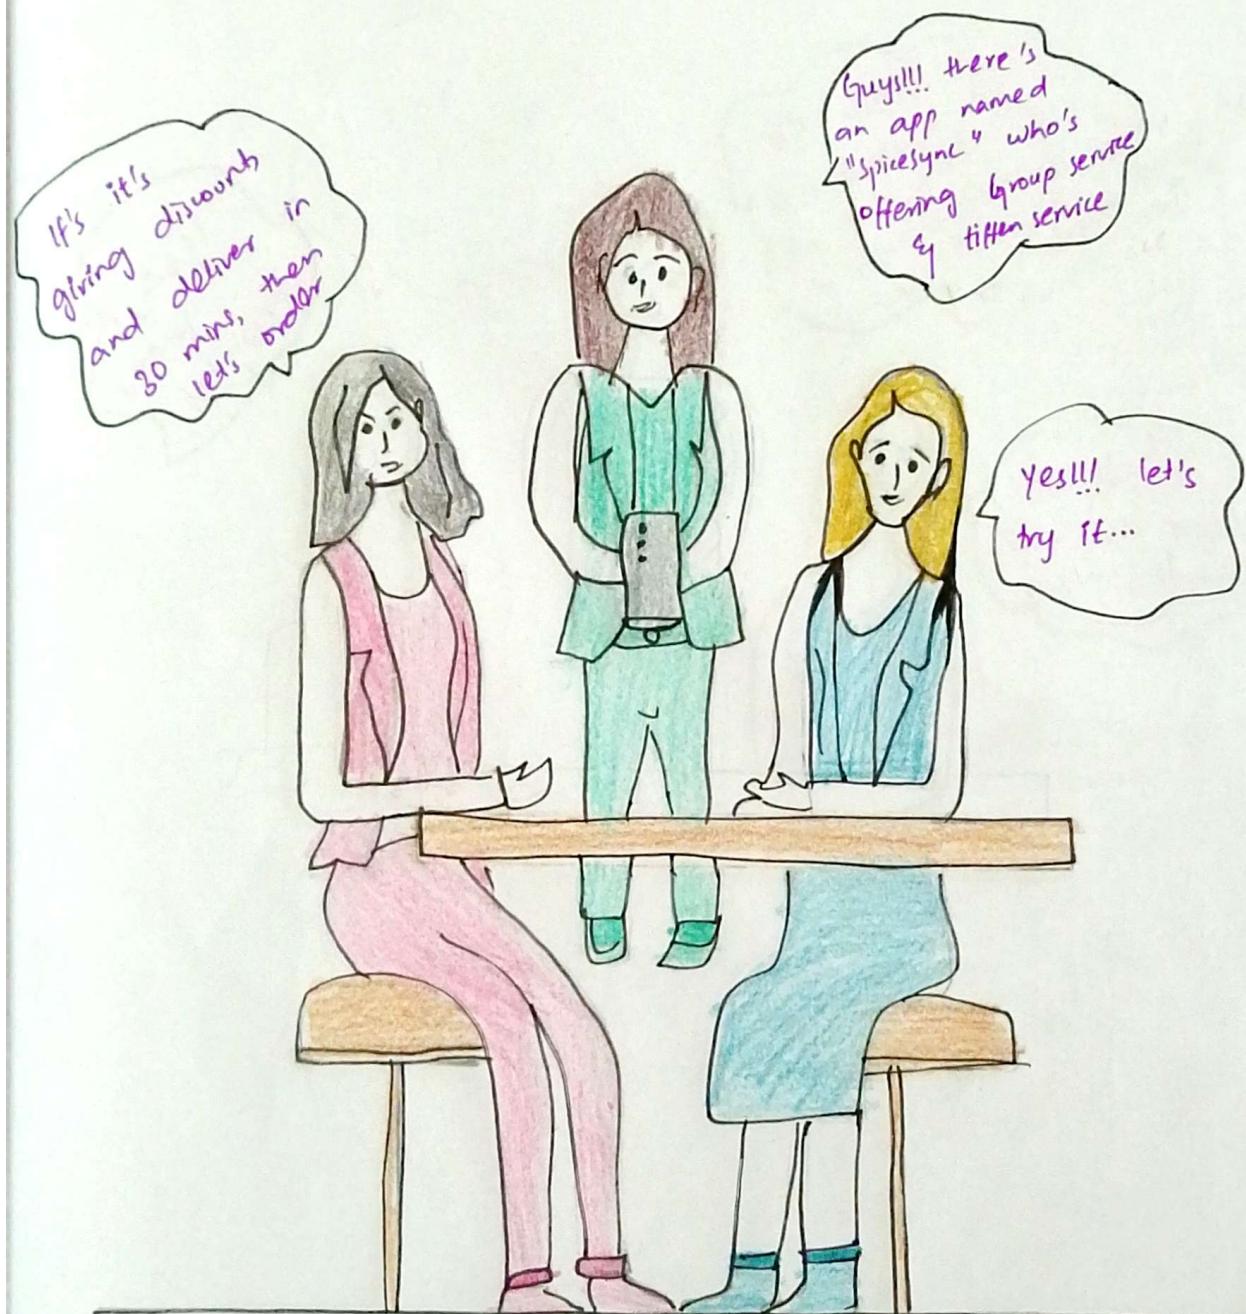

Now all are thinking alternative solutions to satisfy their starving but can't find one except for ordering food online.

7) Nimra think's that she's gonna starve today as there's no food left also she thinks that if they order food, it will take 1 hour to reach & they can't waste that much time.

Simaab came across an app "SpiceSync" while scrolling who's offering group orders & tiffin service and the team are planning to order from it members

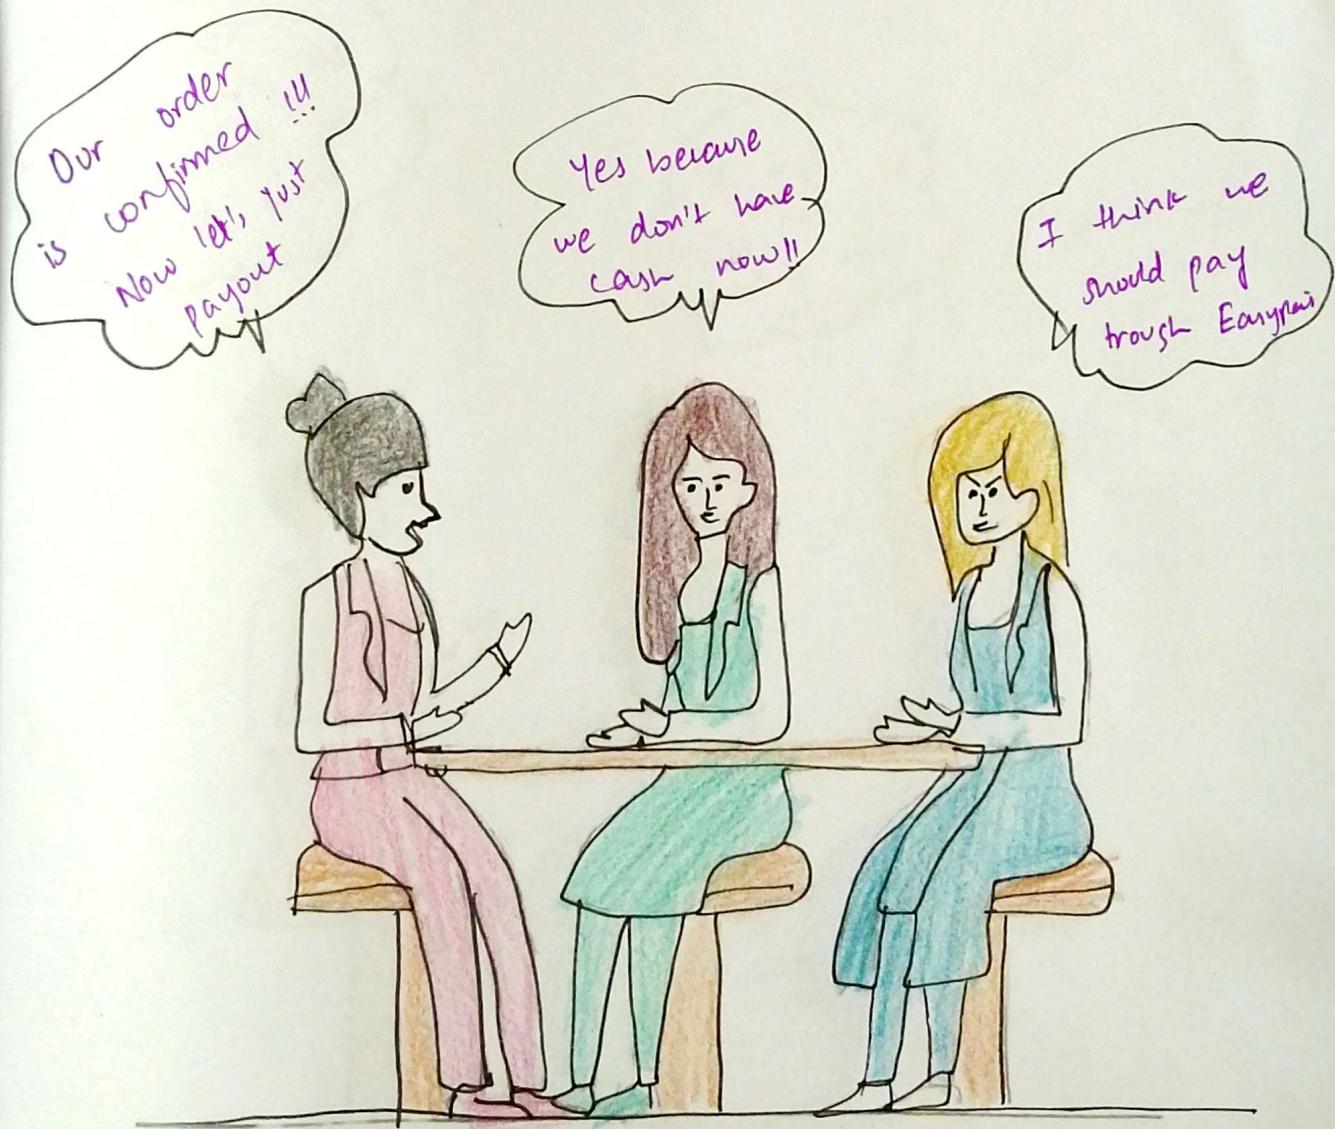

Q) All are talking about the discount and sale which this "SpizeSync" app ~~is~~ is giving. and they finally gonna have some lunch.

They are selecting the order through the AI suggestion feature of SpiceSync and also exploring the regional spices by setting it to "lahore medium"

They were glad that their order was confirmed and that they have an option for EasyPaisa as they came for lunch is hungry so they didn't bring the money.

They were so hungry that nimaab says that if today after 25 mins she didn't get the food she will eat her mouse (such a drama queen).

They were glad to see that their order will be arriving soon by tracking the live location of their order which is an excellent feature of this app

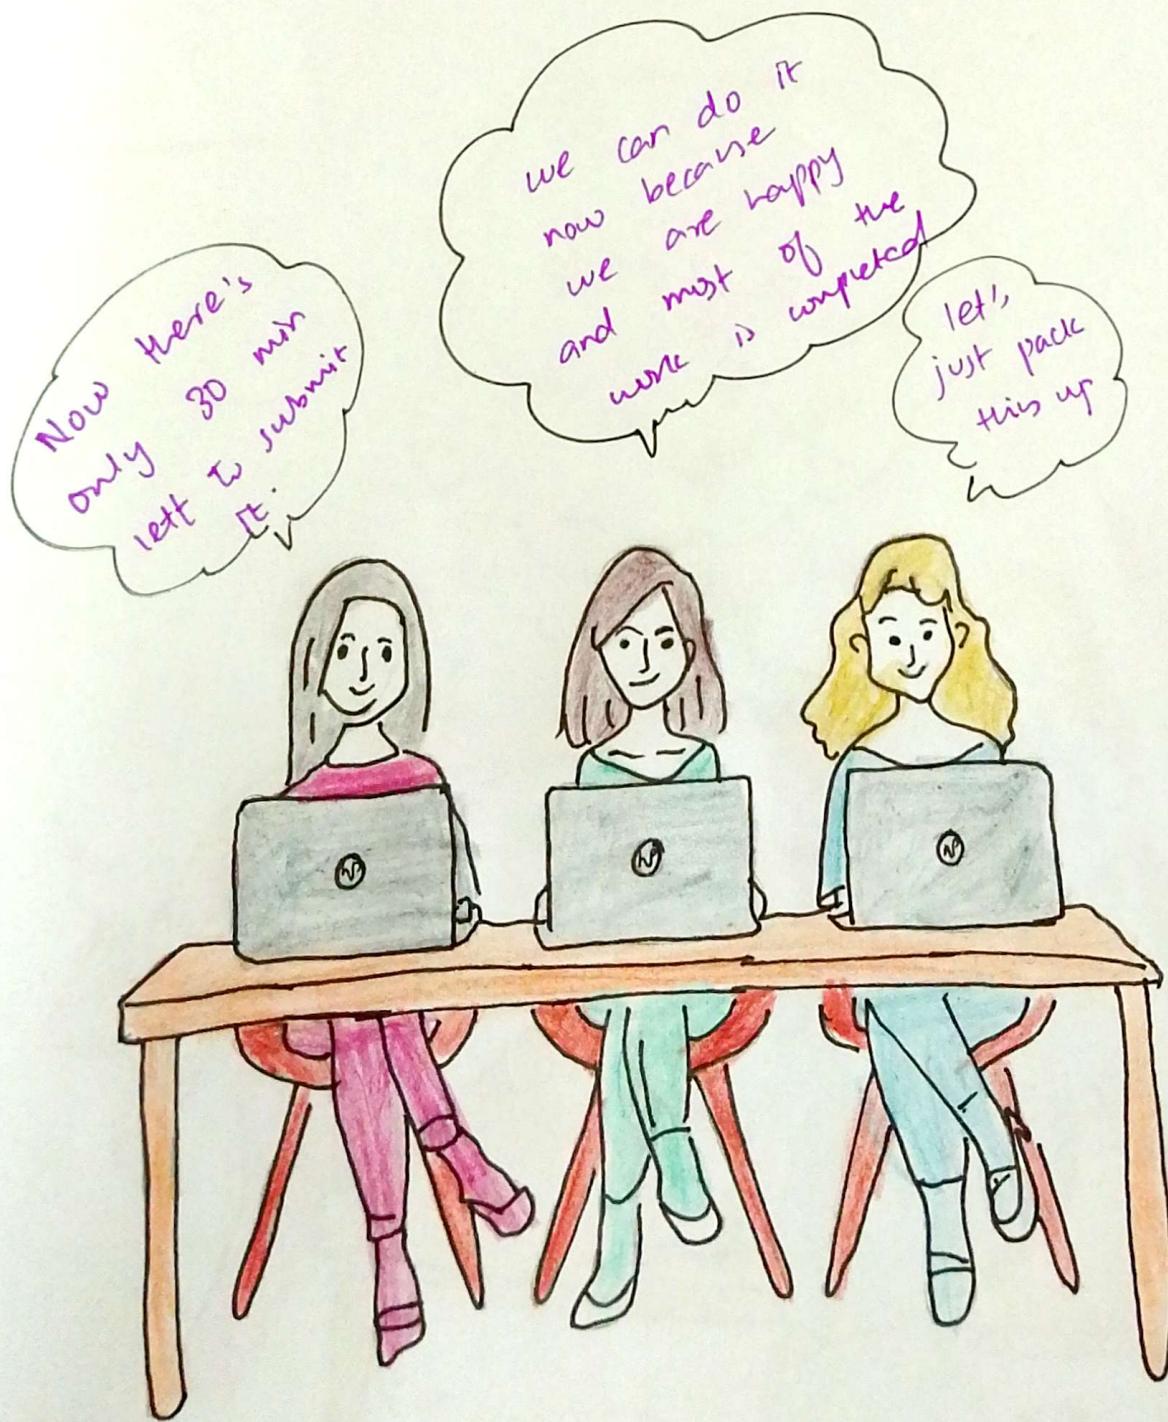

Their food arrived at time & they were so glad to find out that the food was made from 100% halal ingredients also they were satisfied with the food's quality, quantity & price.

(15) They got some extra loyalty points which they can use for the pre-booking of tiffin service and as they were so satisfied they give 5 stars also a very good & effective feedback

After eating, they came back and start doing their work with a fresh & happy mind.

They have completed their work 8 mins earlier so they were happy & celebrating their success by praising "Spice Sync" app
